InternSync – Requirements Status

Generated by `docs/tools/trace.py`; do not edit by hand. Run `python docs/tools/trace.py` after a change to the SRS, an increment's scope, the tests, or a test report.

Each requirement of the SRS with the increment that delivered it, its automated tests (functions named after its acceptance test, for example `test_at_sim_02_…` for FR-SIM-02), and the last result recorded in the test reports.

- **Tested:** at least one automated test carries the requirement's acceptance-test ID in its name.
- **Checked:** a result is recorded in a test report. The check may be automated under another test name, or done in the browser, by a timed run, or by inspection; the test report says which.
- **Open:** the check needs people, devices, or the hosted system and has not been done yet.
